

F01 | Generation-1 scratch outcomes

Repair Without Rewrite / DEVELOPMENT evidence / seed 42

Natural DEVELOPMENT: all six endpoints are ineligible

Arm / peak LR	Errors / 2,270 words	WER %	Completed repair / 64 source errors	Introduced errors / 2,270 words	Invalid/capped / 108 cases
B100 / 1e-4	2,208	97.268722		2,150	0
B100 / 3e-4	2,584	113.832599		2,522	0
B100 / 6e-4	2,664	117.356828		2,602	0
C101 / 1e-4	121	5.330396		57	0
C101 / 3e-4	128	5.638767		64	0
C101 / 6e-4	109	4.801762		45	0

RAW baseline: 64 / 2,270 reference words; WER % = 2.819383

Generated DEVELOPMENT: separate populations and structural qualification

Arm / peak LR	Conformance / 288 cases	Genuine repairs / 192 cases	Repaired fields / 288 fields	Structure invalid / 288 cases	Decoder failures / 288 cases
B100 / 1e-4	0		0	288	0
B100 / 3e-4	0		0	288	3
B100 / 6e-4	0		0	288	0
C101 / 1e-4	131	49	55	70	0
C101 / 3e-4	149	79	90	19	0
C101 / 6e-4	132	54	60	43	0

Natural repairs and introductions are alignment bounds, not statistical confidence intervals.
Generated successes require complete structural qualification; generated learning is not natural repair.
Single seed 42; no sampling bars; training-seed variability and domain transfer are unmeasured.
Both eligible rankings are empty and both selected learning rates are null.
